THE OPPORTUNITY

Freelance hiring is still broken

Employers and freelancers still stitch together marketplaces, email threads, PDFs, calendars, and trust signals that do not talk to each other. TalentLock replaces that fragmented stack with one protected hiring loop.

What employers struggle with

- Hours spent browsing mismatched profiles
- No exclusivity once a freelancer is found
- Handshake deals and weak contract coverage
- Unclear identity and credential trust
- Spend and hiring outcomes scattered across tools

What freelancers struggle with

- Race-to-the-bottom marketplaces
- Ghosted proposals and unpaid discovery time
- No durable proof of exclusivity or quality
- Manual rate negotiation and weak deal flow
- Little visibility into earnings intelligence

THE ANSWER

One platform. Full hiring lifecycle.

01

Discover

AI Match, Talent Vault, TalentSearch, and discovery meetings surface the right people fast.

02

Verify

Aadhaar / ID, employer business docs, and credential expiry tracking build real trust.

03

Lock

Exclusive bookings mark talent unavailable — no double-booking, no mid-project poaching.

04

Contract

AI-generated or uploaded agreements, health scores, redlines, e-sign, and PDF locker.

05

Deliver

Milestones, messaging, reviews, analytics, and post-engagement AI debriefs close the loop.

Why TalentLock wins

It is not another job board. It is infrastructure for professional freelance engagement — matching, exclusivity, verification, legal protection, and operational intelligence designed as one product, not five disconnected tools.

Built around trust and exclusivity

AI Talent Matching

Employers describe the need; GPT-powered matching recommends freelancers with explanations for skills, rate, and availability.

Exclusive Bookings

Confirmed bookings lock talent availability and show a Lock badge — exclusivity is the core market differentiator.

Verified Identity

Freelancer Aadhaar/ID verification and employer business document verification create mutual trust before work starts.

AI Legal Agreements

Generate or upload contracts, score health, summarise in plain English, redline, e-sign, and download certified PDFs.

Cruise Mode & TalentSearch

Rules-based AI outreach: freelancers auto-express interest in jobs; employers auto-reach matching talent via DMs.

Discovery → Brief → Book

Schedule discovery meetings with calendar guests, then receive AI meeting briefs before confirmed calls.

Multi-Currency Hiring

Country-derived currency, dual display in Talent Vault, and frozen booking FX for clean cross-border agreements.

Enterprise Teams

Shared shortlists, invites, team analytics, and unlimited enterprise capacity for high-volume hiring orgs.

WHO IT SERVES

Two sides. One locked marketplace.

Employers

- Talent Vault + AI Match + TalentSearch
- Watchlists, discovery calls, rate suggestions
- Exclusive bookings and milestone tracking
- Spend & hiring analytics dashboards
- Verified Employer badge and team accounts

Freelancers

- Technology and teaching professional profiles
- Public shareable profiles and portfolios
- Cruise Mode auto-outreach on Pro
- Proposal generator and earnings intelligence
- Credential expiry alerts and verified badges

PLATFORM MATURITY

Spec-complete and ready to pitch

Per *spec/spec.md*, TalentLock’s major product modules are marked complete — from matching and verification through messaging, analytics, agreements, and security hardening.

5

Subscription plans across employer & freelancer roles

1

End-to-end workflow from discovery to signed work

Matching & discovery

AI Match, smarter explanations, Talent Vault filters, watchlists, availability calendar, discovery meetings + AI briefs.

Trust & compliance

Document verification, employer verification, credential expiry, auth hardening, GDPR deletion, audit logs.

Commercial engine

Bookings, negotiation, milestones, reviews, multi-currency, team shortlists, subscription gates.

Agreements

AI generation, uploads, templates, redlining, health score, summaries, e-sign, certified PDF download.

Automation

Cruise Mode, TalentSearch DM delivery, job description assistant, rate suggestions, proposal generator.

Intelligence

Earnings intelligence, spend analytics, hiring funnel analytics, post-engagement AI debrief, token usage.

BUSINESS MODEL

Recurring plans that scale with usage

Plan	Audience	List pricing*	What unlocks
Freelancer Free	Talent	\$0	Core profile, limited active bookings & interests
Freelancer Pro	Talent	\$19 / mo	Higher booking capacity + Cruise Mode automation
Employer Starter	Hiring teams	\$49 / mo	Vault access, bookings, job posts, starter AI tokens
Employer Growth	Scaling teams	\$199 / mo	Higher quotas, advanced AI features & analytics depth
Enterprise	High-volume orgs	Custom	Unlimited capacity, team accounts, shared shortlists

THE ASK / THE CLOSE

Own the infrastructure layer of professional freelance hiring.

TalentLock compresses sourcing, verification, exclusivity, contracting, messaging, and performance insight into a single product surface. The market still buys these capabilities as disconnected tools. We sell the lock.

NEXT CONVERSATION

Live product walkthrough · employer & freelancer journeys · go-to-market for technology and teaching talent verticals · partnership or investment discussion.

Securing talent. Unlocking potential.
