ABOUT ME

As a forward-thinking and technically adept DevOps Engineer, I specialize in architecting robust solutions across the multi-cloud landscape. My expertise lies in crafting and implementing automation that seamlessly aligns with specific DevOps requirements. With a deep understanding of Terraform, Azure Cloud, Kubernetes, and Vault, I am committed to professional growth. I consistently stay abreast of the latest industry trends, ensuring that my skills remain at the cutting edge of technological innovation.

EDUCATION

BACHELOR OF TECHNOLOGY

KCG College Of
Technology, Chennai
2014

WORK EXPERIENCE

LEAD DEVOPS ENGINEER

NOV - 2022

Andortech, Chennai

- Spearheaded end-to-end automation of Platform-as-a-Service (PaaS) resources using Terraform, integrated with CI/CD pipelines via GitHub Actions for streamlined application deployment.
- Implemented a cost optimization strategy, achieving annual savings of €46,000.
- Developed and maintained comprehensive monitoring alerts for all Azure infrastructure services.
- Designed and deployed intuitive dashboards to monitor critical service metrics.
- Oversaw the creation and lifecycle management of Azure infrastructure aligned with business initiatives through to production.
- Instituted Azure policies and enforced SQL audit logging to ensure rigorous maintenance of SQL servers.
- Facilitated technical discussions to foster knowledge sharing within the DevOps team.
- Managed a portfolio of 7 applications and led a proficient team of DevOps engineers.

SENIOR DEVOPS ENGINEER

SEP - 2019

NOV - 2022

Mr Cooper, Chennai

- Engineered a comprehensive Terraform stack for provisioning and managing resources on Azure and GCP platforms.
- Automated dynamic credential generation for databases through HashiCorp Vault integration, streamlining security processes.
- Established Vault on both development and production environments, including authentication and secret engine setups.
- Spearheaded CI/CD workflows using Azure DevOps, enhancing infrastructure and application deployment efficiency.
- Delivered expert-led training sessions on Terraform and Vault, elevating team competencies.
- Automated APIGEE proxy deployments, optimizing the pipeline for consistent and reliable updates.
- Enhanced operational insights by implementing Datadog and Prometheus/Grafana for advanced monitoring and dashboarding.
- Orchestrated deployment strategies leveraging container orchestration with GKE and AKS for high availability and scalability.
- Managed a diverse set of Azure and GCP services, fostering a robust multi-cloud infrastructure.
- Utilized Rancher for streamlined management of AKS and a suite of Azure services, ensuring optimal service integration.
- Authored automation scripts for a seamless end-to-end deployment process, encompassing both CI/CD and infrastructure management.
- Monitored logs with precision using Splunk and New Relic, maintaining high standards of application performance.
- Innovated an automated browser scripting solution for New Relic, enabling efficient Selenium testing across multiple application stacks.
- Crafted Kubernetes templates and helm charts, facilitating smooth deployment and integration within automated pipelines.
- Constructed and managed Kubernetes clusters using kubeadm, ensuring a reliable foundation for application deployment and monitoring.

SENIOR DEVOPS ENGINEER

SEP - 2018

SEP - 2019

Photon Infotech, Chennai

- Engineered Terraform scripts for automated provisioning of Azure resources, ensuring consistent environment setup across the board.
- Seamlessly integrated Terraform with Azure DevOps (formerly VSTS) CI/CD pipelines, enabling continuous integration and deployment.
- Utilized Azure CLI and PowerShell scripting for automated database and collection creation, enhancing the automation process.
- Crafted automation scripts to securely transfer secret values into Azure Key Vault, bolstering security and compliance.
- Established Kubernetes clusters using kubeadm and orchestrated application deployment via Helm charts, automated by Jenkins.
- Monitored automated builds and CI processes, proactively resolving build/release failures to maintain high availability.
- Collaborated with interdisciplinary teams to develop software solutions that improved client experiences and system performance.
- Automated the deployment of Docker images to Azure AKS, facilitating application delivery as Kubernetes pods.
- Configured Prometheus for comprehensive host and health metrics collection, contributing to robust monitoring solutions.
- Developed Grafana dashboards to visualize metrics from Prometheus, offering insightful data analysis and reporting.
- Implemented log analysis with Kibana, providing clear insights into system performance and user interactions.
- Architecting blue-green and canary deployment strategies to enhance release management and minimize downtime.
- Integrated Istio service mesh into the Kubernetes environment, improving network traffic management and security.
- Incorporated SonarQube into Azure DevOps pipelines for code quality analysis and reporting, ensuring coding best practices.
- Automated Jenkins CI/CD processes with Octopus Deploy for streamlined application delivery and version control.
- Conducted Anchor Engine scans on application code to identify and mitigate security vulnerabilities, ensuring code integrity.

DEVOPS ENGINEER

JUL - 2017

SEP - 2018

Caredata Infomatics, Chennai

Interfaced with cross-functional team of business analysts, developers and technical support professionals to determine comprehensive list of requirement specifications for new applications

Created end-to-end automation starting from code commit to deployment and validation of application

Created Script to migrate application from Azure cloud to AWS S3 bucket for maintenance

Compressed html and js file to 70% of file size using python script to increase performance of application

Created Architecture for deployment of IOT based applications

Developed windows batch script coding for installation of SQL server 2012, IIS Server - creation of application type and application pool, deployment of application and integrating with IIS and SQL Server

Created script to monitor CPU memory usage alert

Installed OSTicket tool in our on-premise server

Created script to integrate with Osticket to generate day-to-day ticket list with MYSQL database and export values to excel and send it over email

AWS S3, VPC, EC2, Cloud watch, Cloud trail, Cloud front, IAM

Wrote code and developed tools and integrations to meet cross-platform user needs

Reached working prototype stage of development quickly due to insight into user needs and requirements

Monitored automated build and continuous software integration process to drive build/release failure resolution

Worked closely with other business analysts, development teams and infrastructure specialists to deliver high availability solutions for mission- critical applications

SENIOR SYSTEM ENGINEER

NOV - 2014

JUL - 2017

Cognizant Technology Solutions, Chennai

- Engineered and sustained a robust network infrastructure leveraging Windows, Linux, and virtualization technologies.
- Crafted and executed comprehensive testing protocols, complete with meticulous documentation, effectively presented for client approval.
- Seamlessly transitioned source code repositories from TFS/SVN to GIT, utilizing specialized migration tools.
- Pioneered automation of build and deployment processes using ACM (proprietary tool) and Jenkins, enhancing operational efficiency.
- Implemented systematic backup strategies for artifact and source code preservation, ensuring long-term maintenance.
- Streamlined operations by automating routine tasks, significantly reducing labor costs and boosting productivity.
- Maintained transparent communication, promptly updating stakeholders during issue resolution.
- Played a pivotal role in requirements elicitation and analysis, contributing to the design and production of innovative projects.
- Delivered exceptional helpdesk service, consistently exceeding customer support expectations.
- Fostered collaboration with multidisciplinary development teams to conceptualize and deliver cutting-edge products.
- Authored detailed protocols, qualification documents, test plans, and reports, underpinning a robust quality assurance framework.
